# Start Here

Life Planner Spreadsheet · Google Sheets & Excel

## What is in your download

1. **Life-Planner-Example.xlsx** — filled with sample data so you can see every tab working.
2. **Life-Planner-Blank.xlsx** — the same planner, empty and ready for you.
3. **START HERE - Getting Started.pdf** — this guide.

## Open it in Google Sheets (free)

1. Go to drive.google.com and sign in.
2. Click **New › File upload** and choose **Life-Planner-Blank.xlsx**.
3. Double-click the file, then **File › Save as Google Sheets**. Work in the new Google Sheets copy.

## Open it in Microsoft Excel

1. Double-click **Life-Planner-Blank.xlsx** (Excel 2016 or newer, Windows or Mac, or Excel for the web).
2. If a yellow bar says *Protected View*, click **Enable Editing**.

## Set up in two minutes

1. Open the **Setup** tab: type your name and your currency symbol.
2. Type the first day of the month you are planning, for example 1 Nov 2026.
3. Rename the income and expense categories to match your life. Every tab picks up the new names.

**The one rule:** type only in the **white** cells. Colored cells hold the formulas that make the planner work.

# How each tab works

| | |
|---|---|
| **Dashboard** | Income, expenses, balance, safe-to-spend per day, next tasks, habits, cleaning due, savings and today's meals. Nothing to type. |
| **Money Log** | The only place you type money: date, Income or Expense, category, amount. 500 rows. |
| **Budget** | Type your planned amount per category. Actual, left and percent used are calculated for the Setup month. |
| **Annual** | All 12 months of the Setup year, built from the Money Log. |
| **Savings & Debt** | 12 savings goals and 12 debts. Type the target or balance and what you have saved or paid. |
| **Tasks** | 100 tasks with category, due date, priority and status. Choose Done to cross a task off. |
| **Habits** | 20 habits for the Setup month. Type a lowercase x on each day you did it. |
| **Cleaning** | Type the date you last did a chore; next due date and status update. |
| **Goals** | 10 goals with why, deadline, five steps (tick with x) and a reward. |
| **Week Plan** | Type the Monday date (or keep the automatic current week) and plan by the hour. |
| **Meals** | Plan the week and write your grocery list by aisle. |
| **Calendar** | The Setup month with the number of open tasks due each day. |

## Start a new month

Change the planning month in **Setup**. Keep logging in the same Money Log; Budget, Habits and Calendar switch to the new month, Annual keeps the whole year. For habits, clear the x marks or keep a copy of last month's tab.

## Good to know

Apple Numbers is not supported. These are personal planning templates, not financial advice. Personal use only; please do not share or resell the files.
